<h3><i>Introduction</i></h3> <ul style="list-style-type: none">• <u><i>Classroom Expectations</i></u>• <u><i>Regular Bell Schedule</i></u> • <u><i>Course description and requirements</i></u><ul style="list-style-type: none">◦ <u><i>SD Memory Card Requirements</i></u>• <u><i>Proposed CourseText</i></u>• <u><i>Beacon Program (SUNY Colege Credit)</i></u> • Friday Morning Video Announcements<ul style="list-style-type: none">◦ <u><i>Video Release Form</i></u>◦ <u><i>Example announcements segments</i></u>◦ <u><i>Our Vide Channel</i></u> • Required Audio & Video Projects<ul style="list-style-type: none">◦ <u><i>Instructional Video</i></u>◦ <u><i>Commercial</i></u>◦ <u><i>2 Camera Interview</i></u>◦ <u><i>Audio Project</i></u>◦ <u><i>Foley Project</i></u>◦ <i>Documentary / PSA</i>	1 Week
<h3>Video Production Process</h3> <ul style="list-style-type: none">▪ <u><i>Pre Production</i></u>▪ <u><i>Production</i></u>	10 Weeks

- **Post Production**

- **Pre-Production**

- Pre-production is the planning phase of the video production process. It is important to develop a clear and meaningful topic through research and writing.
-

- **Pre-Production Writing**

- **Correlation between the Writing Process & The Video Production Process**

- **Writing a News Story**

- What is News?
 - **What is News - Hew Edwards**
 - **What is News - Key Points**

- **Finding News Stories**

- **How do journalists find news?**

- **Research Your Topic**

- **How do you research and check facts for news?**
 - If interviews are planned, students will need to research each subject thoroughly before developing their questions.

- **Writing Concisely**

Look at this information about a new study into **children and their use of mobile phones**. Pick out what you think are the most important points and then write a short script (of no more than five sentences) explaining what the story is about

Remember to cover the 5 W's:

- **What's happening?**
- **Who is involved?**
- **Where is this happening?**
- **When is it happening?**
- **Why is it happening?**
- **How do you write a news script?**
 - **Clear - use simple language**
 - **Concise - keep sentences short**
 - **Correct - check your facts, grammar and punctuation**
- **Writing for TV, Radio and Online**
 - **MOST IMPORTANT: Check your facts**
 - **Think about how scripts might be different, depending on the platform they are using.**
 - **TV** - Students will need to think about the pictures - what shots would illustrate their reports? They don't

need to write about what they see as people can see it? Will students include a piece-to-camera?

- **Radio** - Think about using many more describing words so students can paint a picture for the people who are listening. What sounds would help their audience understand what is going on - eg: a ringing phone.
- **Online** - Get most of the crucial information in the top four paragraphs. What pictures would they use to illustrate the report?
- **Scripting for Film and Video Productions (Screenplay)**
 - **A script is a text-based planning document that can be used as a stand-alone document or in conjunction with a storyboard as needed. If used as a stand-alone document, it should include descriptions of the specific shots and other visual elements, as well as the dialogue and other audio.**
 - **Structure of a Screenplay**
 - **Movie Script Format Explained**

 - [The Three Act Structure](#)
 - [How to Write a Script For a Movie + Storytelling](#)

- **Planning the Project**
 - **Storyboarding**
 - Storyboarding is a great way to visualize how a story will be told. A basic storyboard resembles a comic strip with audio/dialogue descriptions and pictures representing the shots in each scene as they progress over time. The drawings don't have to be complicated—stick figures will do—just some sketches that indicate what students want their

audience to see in their video as they tell their story.

-  [Intro to Storyboarding](#)
-  [Storyboard Comparison - Write it in the Sky Remix Music Video](#)
- [How to draw A-grade storyboards \(even if you can't draw!\)](#)
- [Blank Storyboard Page](#)

- **Timeline for the Project:**

- A timeline is a basic outline of the flow of the project and can be helpful in keeping the project moving forward. It's a simple and easy way to keep everyone on task and working together on schedule. The timeline will be based primarily on the needs of the project as outlined in the script or storyboard.

- **Checklist:**

- This document lists all equipment and material needs of for a production and is especially important for on-location shoots. In creating a checklist, focus on items that you are most likely to forget to bring to the shoot such as extra batteries, duct tape, microphones, costumes, props, scripts, lighting equipment, and release forms.

- **Schedule the Shoot:**

- The last step before the cameras start rolling is scheduling the shoot. Sometimes the schedule can be broken down into a shot list. What footage is needed, and who is responsible for getting those shots?
- When scheduling, consider shooting out of sequence to save time; this means shooting all the footage needed at each respective location and then reassembling later in post-production, according to the script. Most movies are shot out of sequence.

and technical crew to achieve the final look and feel of a production.

- [The Director: Crash Course Film Production](#)

- **Cinematographer**

- Cinematography is the art and craft of making motion pictures by capturing a story visually. Though, *technically*, cinematography is the art and the science of recording light either electronically onto an image sensor or chemically onto film.
- Taken from the Greek for "writing with movement," cinematography is the creation of images you see on screen. A series of shots that form a cohesive narrative. Cinematography composes each shot, considering, where everything in frame demands attention.
- [The Cinematographer: Crash Course Film Production](#)
- [Dissecting The Camera: Crash Course Film Production](#)

- **Audio Technician**

- Audio technicians are responsible for all of the sound elements in a production. The audio technician performs mic checks on the set of a production to maintain an accurate audio balance. In audio post, he or she will harmoniously incorporate natural sound, music, sound effects, and voiceover treatments into the finished product.
- [Sound Production: Crash Course Film Production](#)

- **Set Design**

- Literally, 'mise-en-scene' means "placing on stage." But in film, mise-en-scene encompasses everything the camera is capturing. The artists and crafts-people who work in Production Design, Wardrobe, and

Hair and Makeup are responsible for setting the stage of a film and making sure the characters fit on that stage. In this episode of Crash Course Film Production, Lily talks us through the roles involved in designing the world of a film.

- [Designing the World of Film: Crash Course Film Production](#)

- **Lighting Design**

- It's time to look at some of the most under-sung heroes of the film world, Grip and Electric. Doing everything from setting up dollies and tripods, to helping the cinematographer shape the light with flags and silks, the Grips are there to make it work properly. And when working with electricity (as pretty much ever film set does) you need experienced technicians to make sure you are doing it safely and that you'll have the power you'll need. Which is where the Electric department comes in.
- [Grip and Electric: Crash Course Film Production](#)

- **Special Effects**

- Chances are, when you hear the phrase "Special Effects," you may have images pop into your mind. The Hulk smashing a city, a lightsaber fight, or maybe an alien world. But effects can be much more subtle and have been around really since the beginning of filmmaking. In this episode of Crash Course Film Production, Lily Gladstone talks about the basics of special effects.
- [Special Effects: Crash Course Film Production](#)

- **Editor**

- The editor works with the producer and director to assemble and polish the finished program, using video and audio captured during the production phase.
- [The Editor: Crash Course Film Production](#)

- **Film School or Not**

- Should you go to film school? Great question? But there aren't necessarily a lot of direct answers. Do you want to go to Hollywood? Do you want to make movies in your spare time? Do you want to learn about world cinema? Do you want to be a director? A cinematographer? An editor? Do you want to pay for tuition? All of these questions can help you figure it out, but today Lily Gladstone will talk us through a few important things to keep in mind when deciding if film school may be right for you!
- [To Film School or Not To Film School: Crash Course Film Production](#)

- **Film School or Not**

- Should you go to film school? Great question? But there aren't necessarily a lot of direct answers. Do you want to go to Hollywood? Do you want to make movies in your spare time?
